Dec 2024 – Feb 2025

### Skills

- Tailwind CSS
- MongoDB & SQLite
- JavaScript
- Python
- React JS & Next JS
- Node JS & Express JS

### Projects

#### E-commerce Website – MERN Stack -> <https://mern-ecommerce-rnup.onrender.com/home>

- Developed an E-commerce website utilizing the MERN Stack,
- Implemented secure user account creation and login functionality.
- Designed a user-friendly interface for browsing product categories and adding items to cart.
- Streamlined the checkout process for a seamless and secure shopping experience.
- Implemented order confirmation system to ensure successful transactions.

#### Employee Management – MERN Stack -> <https://employeemanagement-c46a.onrender.com/home>

- Employees and Admin can log in securely and access their personalized dashboard.
- Employees can apply for leave by providing necessary details like leave type, days, and their department.
- View a detailed history of submitted leave requests, including their status (Pending, Approved, and Rejected).
- Access and view their personal profile, including job details and contact information.
- Admins can register new employees, update, or delete them. And can add, edit, or delete departments to keep the organizational structure updated.
- View and manage all leave requests from employees, categorized into Pending, Approved, and Rejected statuses. Admins have the authority to approve or reject leave requests of the employees.

#### Frontend Project – React.js & TailwindCSS -> <https://contract-iq-drab.vercel.app/home>

- Developed a responsive website that worked across devices for Contract IQ with three main pages: Homepage, About, and Contact, focusing on Ethereum and blockchain services using React and TailwindCSS.
